Franklin County plant species list compiled by L. C. Anderson

Species listed without any marginal notation were found somewhere in the county (and nearly all documented with specimens at FSU), but those with marginal notations are not necessarily exclusive to the coded areas.

Code for marginal notes:

- = found only on certain island; not on mainland
- A = along Apalachicola River (ANERR area)
- gA = Gulf County portion of ANERR
- C = Cape St. George (Little St. George) Island
- D = Dog Island
- G = St. George Island
- V = St. Vincent Island
- * = seen but not collected

[blank means from the county but not seen from ACDG or V]

- This listing is fairly comprehensive, but 20 years old, so nomenclatural updating is needed).
